Suitable for those wanting to design and build dry stone structures in contemporary architectural, landscape or heritage settings eg feature entrances, sculptural or functional elements such as fences or retaining walls for wineries, golf courses, farms to name a few applications

- Archaeologists
- Architectural conservators
- Architects
- Builders such as stonemasons
- Educationalists
- Heritage advisors
- Historians
- Landscape architects
- Interior designers; decorators
- Landscape gardeners
- Professionals organisations such as LIAV, MBA, AIA
- Sculptors
- Suppliers
- Trades people
- TAFE teachers
- Urban planners and developers
- those interested in stone as a natural material with environmental benefits.

1970's David served as an understudy to a landscape gardener who specialised in different forms of stonemasonry. This early stewardship led to various opportunities within the landscape industry as it was beginning to emerge as a stand alone discipline within the construction Industry.

1980's Study took him into the recently established field of Landscape Architecture at RMIT. He went onto to partner in a landscape gardening firm with commissions varying from private residences to large public spaces.

1990's David founded 'The Right Branch' to provide a specialist service to the Construction Industry from heritage projects to sculptural commissions. Changing economic times required an extension of earlier skills gained - enter Dry Stone Walling.

David has completed work on the construction of a massive dry stone wall as part of a private commission just outside Melbourne. The wall dimensions are Length: 200m Top of wall: 550mm; High Point: 4.5m; Base dimensions: 1.5 – 2.7m and Low Point: 2.8m

Other major projects include:

- Malvern Valley Golf Course entrance
- The township of Ternag's entrance
- The construction of "Tanderum" sculpture on Herring Island
- Gateway entrance at Melbourne University's Glenormiston Campus.

In November 2001, David was awarded the **Master Builders Association of Victoria/ ISS Institute Fellowship**.

The purpose of the Fellowship continues to be to revive the high level skills and knowledge required to maintain heritage sites and to translate those capabilities into contemporary contexts.

Dry Stone Walling Workshop at 'Hanson'

Introduction

Dry Stone Walling is one of the few crafts that still uses the principles handed down since man created 'the enclosure' to protect himself from tempest, enemies and agrarian pursuit.

Dry Stone Walling has been with man through the ages as it was easily adapted into various lifestyles, because of the ease of its availability and its longevity.

Today, Dry Stone Walling is a craft that is slowly being left behind as building technologies produce time efficient constructions. These constructions do not have the aesthetic appeal, or the versatility of natural stone in today's built environment.

David's Fellowship and this workshop is part of a strategy to revive and expand the use of dry stone work so as to maintain heritage sites, but also to create new work.

The techniques can be applied not only to residential gardening/landscaping works, but also in the construction of functional and decorative projects as part of public and domestic landscaping and in general to create beautiful, everlasting environments - from atriums, courtyards, sculptures in public spaces, corporate team building exercises, garden walls and seats, BBQ areas, entrance ways - to add lasting value to the spaces in which you work, live or play.

Project

Take away skills, knowledge and insights into the craft of Dry Stone Walling.

Be part of a team to work on constructing a wall on a site which is the source of the stone - the quarry.

This special event will focus on the construction of a section of dry stone wall.

Build on this knowledge with your new found ability to add value to landscape environments whether contemporary or historic, for corporate or commercial clients, or create garden features around your own home such as feature seats, entrances, walls or sculptural elements - life long creations.

Venue

Hanson
1140 Wellington Rd
Rowville

Melway map: 82 E4

Topics

Topics covered include:

- Selecting stone
- see first-hand how it is mined from the face of the quarry
- Terminology
- Types of stone
- Setting out
- Preparing foundations
- Frame construction and string lines
- Stripping out
- Building and packing (hearting)
- Cheekend
- Wall end construction
- Appropriate tools
- OH&S

Format

The workshop comprises lecture, demonstrations, group and individual discussion and a hands-on project.

Participants will work under David's supervision on the construction of the wall.

Fee

\$180 which includes:

- Materials
- Use of equipment
- Lunch
- Morning and afternoon refreshments
- Included in the fee is also a copy of David Long's 'Dry Stone Walling Overseas Fellowship Report'. It sets out the places he visited whilst overseas, the different designs, construction methods and materials.

Early Bird \$150 for those who Register and pay prior to 17th April 2009.

Date•Time

Saturday, 2nd May 2009
commencing promptly at 9.00am
and concluding 4.30pm.
