

Helloooooo! \$190 puts me in Denmark and Milan without stepping on a plane.

Am I happy, achieving, creative, productive? I need to jump out of the busy day-to-day rut - and reach out and take time to refresh, to enhance what I already know, be inspired, to collaborate with others - to be more successful at what I do.

Current registrations a barrister whose specialisation is IP and design law, industrial designers, a retailer, product designers, university staff from Tasmania and ANU, furniture designers and manufacturers, a silversmith, cabinetmakers, an engineer, a sustainable designer, a joiner, business owners to name a few...

There is no such person as a 'beginner' - we all bring our life's experiences and know-how with us into familiar and new contexts - it is the bringing together of this diversity that innovative solutions flourish and we grow.

Are you • Industrial and product designers • Interior designers or decorators • Textile designers • Jewellery designers • Craftspeople • Ceramicists • Trades people • Suppliers • Professional associations • Manufacturers • University lecturers • TAFE teachers • Trades • Furniture designers • Ceramicists • Cabinetmakers • Fashion/Accessories designers • Engineers • Designers makers • Those who have ideas and want to take them to the marketplace.

Thought about it? Two eminent European designers, one Arturo, the other Erling - Erling's 'Outdoor Furniture workshop' - also Arturo's Design Masterclass.

Although the Masterclass project is focused on tourism, the project topic doesn't really matter, it's the **process** to take great ideas into really new, innovative products - register for either, or both workshops.
